

Trends in National Spending Priorities, 1973-2006

Tom W. Smith

General Social Survey  
National Opinion Research Center  
University of Chicago

January 10, 2007

Facing continuing large deficits and sharp disagreements on what the projected impact of tax cuts and economic conditions will be on future budgets, the President and the new Democratic Congress may wish to consider what the American people think governmental spending priorities should be and how their preferences have changed over the last four decades.

Since 1973 the General Social Surveys (GSSs) conducted by the National Opinion Research Center at the University of Chicago have asked people whether government spending in various areas from health to foreign aid is too much, too little, or about right. Table 1 presents the spending preferences of the American public for all areas across all years. (The question wording is given in Table 1 and details on the GSSs appear in the Technical Appendix.) Eleven spending topics have been covered in the 25 GSSs between 1973 and 2004, 20 spending areas from 1984-1998, 21 in 2000, and 22 in 2002-2006.

To help distill this crunch of numbers, public support for spending is summarized in net spending scores. Net spending is the % saying that "too little" is being spent minus the % saying "too much" is being spent. For example, in 2006 68.9% said that "too little" was spent on the environment and 7.0% said "too much" was spent for a net spending score of +61.9 (i.e.  $68.9\% - 7.0 = +61.9$  percentage points). If everyone favored more spending for an area, the maximum net spending score would be +100.0 and if everyone wanted less spending, the net spending score would -100.0. Positive scores indicate that more people want to increase spending than to decrease it and negative scores mean that the cutters outnumber the adders.

#### Current Priorities:

Education had generally led spending priorities in recent years, topping the list in 1996-2002 and 2006. In absolute terms support for educational spending has been very high and changed little since 1989 (with net spending scores ranging from +65.8 to +71.5).<sup>1</sup>

After a first place rank in 2004 health finished second in 2006 with a score of +66.4

Together Health and Education distinguish themselves from the other areas as regularly being among the most favored programs during the last decade. In nine surveys since 1990 Health topped the list twice and Education finished first six times. Moreover,

---

<sup>1</sup> Table 2 shows the rank and net spending scores for the eleven areas consistently covered from 1973 to 2006, Table shows the same for the areas covered in 1984-2006, and Table 4 for the areas covered in 2002-2006. The current (2006) rankings mentioned in this section are from Table 4.

they both are consistently ahead of the next group of spending areas.

Next, in 2006 comes six closely grouped areas, Assistance to the Poor 3rd at +62.0, the Environment 4th at +61.9, Social Security fifth at +59.2, Dealing with Drug Addiction 6th at +54.8, and Halting Crime 7th at +54.6. These spending areas are not only close in absolute terms, but have frequently switched relative positions in recent years.

Assistance to the Poor has strongly rebounded from a 10th place showing in 1996. It showed its top relative finish ever in 2002-2006 and had its best ever absolute score (+63.5) in 2004.

Support for environmental spending rose from +35.8 in 1980 to +70.4 and a first-place rank in 1989. But then backing of the Environment declined to +51.3 and a 7th place position in 1993. Since then the Environment has nudged upwards in both its net spending score and its relative rank.

Social Security has gained major ground in recent years rising from 10th place in 1993 and 1994 to 9th in 1996, 5th in 1998, 4th in 2000-2004, and 5th in 2006. Its net spending score of +60.5 in 2004 in was the highest it has ever achieved and its score of +59.2 in 2006 is the second highest ever.

Dealing with Drug Addiction hit its recorded high of +66.8 and ranked 2nd in 1988, but slid back to a 7th place position with +57.7 by 1990. In 2006 both its rank (6th place) and net spending (+54.8) showed gains over recent years.

Halting Crime was the perennial top choice from 1974 to 1988 and even regained first place in 1993 and 1994. But since 1994 net spending dropped from +71.4 to +50.6 in 2002, the lowest support for Halting Crime ever recorded. Despite some recent gains, its 2006 score of +54.6 and 7th place position are still low compared to its earlier period of dominance.

While support for more spending for Dealing with Drug Addiction is not notably higher than support for additional spending for Halting Crime, this is the first time that there has been more support for combating drugs than fighting crime.

Assistance for Childcare is 8th with a score of +47.4. Since first included in 2000, support for more spending for Childcare has weakened somewhat.

Law Enforcement is in 9th place with a score of +45.8 in 2006. Support for spending on Law Enforcement has always trailed support for Halting Crime because people are attracted to the results-oriented action promised in the latter area. Like support for Halting Crime, support for Law Enforcement is up somewhat in 2006 from its lowest-measured level in 2002. This increase may reflect recent increases in homicides and some other crime rates.

Drug Rehabilitation comes in 10th place in 2006 with a score of +43.3. Support for spending on Drug Rehabilitation has almost

always been lower than support for Dealing with Drug Addiction, but the gap widened appreciably in 2006.

In 11th place in 2006 comes Solving the Problems of Big Cities with a score of +35.2. In both rank and absolute score support for Solving the Problems of Big Cities fell from the mid-1990s to 2004, but in 2006 it moved upwards.

Supporting Scientific Research is 12th in 2006 with a score of +31.5. Since first included in 2002 supported has steadily grown.

Mass Transportation is at 13th place in 2006 with a score of +30.9. Relative position and net spending scores are moderately higher than in the early 1980s, but have changed little in recent years.

Parks and Recreation is in 14th place with a score of +27.1 in 2006. Parks and Recreation has stayed around the same position over the years and its net spending score has changed little.

In 15th place comes Highways and Bridges with a score of +24.0 in 2006. Both rank and absolute score set record lows in 2004, but support increased in 2006.

In 16th and 17th places in 2006 are two items on government programs for African Americans. Support for Improving the Condition of Blacks is at +21.1 and for the less results-promising Assistance to Blacks support stands at +2.0.

Defense is in 18th place in 2006 and is the first topic to show a negative, net spending score (-12.6). While low on the priority list, support rose appreciably from a low of -33.4 in 1993 to a recent high of +7.8 in 2002 in the aftermath of the 9-11 terrorist attacks. Support for more spending then dropped notably from 2004 to 2006.

Welfare in 19th place in 2006 with a record high score of -13.2 has regained considerable ground from a near record low of -49.3 in 1994. (Its low point was -49.6 in 1977). Welfare has always been favored much less than Assistance to the Poor. People like the idea of the government helping those with low-incomes, but consider Welfare a failed program. Part of the rise in support for Welfare reflects a positive response to the welfare reforms of the mid-1990s.

In 20th place comes Assistance to Big Cities at -14.5 in 2006. It finishes much worse than Solving the Problems of Big Cities because it does not promise positive results. It has shown little change in its rank or absolute score over the years. It is one of only four areas that has always had negative scores.

In 21st place is Space Exploration with a score of -22.7. Space has always finished close to the bottom. While its absolute score is up from -44.5 in 1993, its rank is unchanged.

In last place in this and every year comes Foreign Aid with a score of -53.8 in 2006. This is Foreign Aid's best score, up from -70 to -72 in the early and mid-1990s, but this leaves it solidly in

22nd place.

#### Overall Spending Trends:

Support for overall spending (i.e. the average net spending across areas) has always been positive with more people favoring increases than cuts (Table 5). Looking at the 11-items that can be tracked from 1973 to 2006, support declined in the early 1970s to low points in 1976-78 (+11). The public then generally increased its overall support for spending over the next dozen years to highs of +24/25 in 1988-90. Then overall spending once again slipped to a moderate level of +16.8 in 1994 before rising again to a near record high of +23.7 in 2006.

Support for domestic social spending (average net spending for Health, Education, Welfare, Solving the Problems of Big Cities, and Improving the Condition of Blacks) has also always been in the pluses. It fell from an early high of +29.2 in 1974 to a low of +13/14 in 1977-78. Support then generally moved up to a record high of +39.9 in 1990. Support then slipped to +26.4 in 1994 and since then rose to +35.6 in 2006.

#### Conclusion:

Despite a dislike of taxes (e.g. in 2006 58% said their own federal income tax was too high), more people have always favored increases in spending than cuts. In 2006, as in most years since the 1970s, people have backed more spending in about three-quarters of the areas and less spending in only the bottom quarter. Moreover, the number of areas with positive net spending scores not only outnumber areas with negative scores, but are also larger. In 2006, the largest negative score (-53.8 for Foreign Aid) was decisively bested by the top two positive scores (Health +66.4 and Education +68.7).

The level of support has however waxed and waned over the decades. From 1993 to 2000 it showed an upswing with overall spending scores approaching the record levels of the late 1980s and early 1990s. After a drop in 2002 support for spending again rose in 2004 and 2006.

Currently Education and Health are clearly the public's top two spending priorities with very high scores (respectively +69 and +66) that are consistently above even other very popular areas like Social Security, Crime, the Environment, Dealing with Drugs Addiction, and Assistance to the Poor (+43-62).

Table 1

Trends in National Spending Priorities, 1973-2006

We are faced with many problems in this country, none of which can be solved easily or inexpensively. I'm going to name some of these problems, and for each one I'd like you to tell me whether you think we're spending too much money on it, too little money, or about the right amount. First, (READ ITEM A)... are we spending too much, too little, or about the right amount on (ITEM)?

## Abbreviations/Labels Used in Tables 2-4:

AidBlks=Assistance to Blacks  
 AidCity=Assistance to Big Cities  
 Crime=Halting the Rising Crime Rate  
 Defense=The Military, Armaments, and Defense/National Defense  
 Drugs=Dealing with Drug Addiction  
 Educ.=Improving the Nation's Education System/Education  
 Envir.=Improving and Protecting the Environment/The Environment  
 ForAid=Foreign Aid/Assistance to Other Countries  
 Health=Improving and Protecting the Nation's Health/Health  
 ImpBlks=Improving the Condition of Blacks  
 LawEnf=Law Enforcement  
 Parks=Parks and Recreation  
 Poor=Assistance to the Poor  
 Rehab.=Drug Rehabilitation  
 Roads=Highways and Bridges  
 SocSec=Social Security  
 SolCity=Solving the Problems of the Big Cities  
 Space=Space Exploration Program/Space Exploration  
 Trans.=Mass Transportation  
 Welfare=Welfare

## Trends in Overall and Domestic Welfare Spending, 1973-2006

	Overall Spending	Domestic Social Spending
1973	+14.1	+24.2
1974	+16.1	+29.2
1975	+13.6	+25.0
1976	+10.7	+16.1
1977	+10.9	+13.9
1978	+11.3	+13.3
1980	+17.4	+14.7
1982	+13.8	+20.9
1983	+16.3	+24.1
1984	+19.1	+31.0
1985	+15.5	+23.2
1986	+17.9	+29.4
1987	+20.3	+29.4
1988	+24.4	+35.2
1989	+24.5	+35.2
1990	+24.3	+39.9
1991	+22.9	+36.1
1993	+17.0	+32.0
1994	+16.8	+26.4
1996	+16.9	+27.8
1998	+19.5	+31.1
2000	+23.4	+35.5
2002	+21.1	+32.7
2004	+23.1	+34.9
2006		

Overall Spending = Average Net Spending for all 11 items

Domestic Welfare Spending = Average Net Spending for 5 items (Improving and Protecting the Nation's Health, Solving the Problems of the Big Cities, Improving the Nation's Education System, Improving the Condition of Blacks, Welfare)

## Technical Appendix

### General Social Surveys (GSS)

The GSS are conducted by the National Opinion Research Center at the University of Chicago. James A. Davis, Tom W. Smith, and Peter V. Marsden are the principal investigators. The GSS are full-probability samples of adults living in households in the United States. Interviews are conducted in-person. Sample size across 1973-2000 totals 38,613 respondents (1973=1504, 1974=1484, 1975=1490, 1976=1499, 1977=1530, 1978=1532, 1980=1468, 1982=1506, 1983=1599, 1984=1473, 1985=1534, 1986=1470, 1987=1466, 1988=1481, 1989=1537, 1990=1372, 1991=1517, 1993=1606, 1994=2992, 1996=2904, 1998=2832, 2000=2817; 2002=2765; 2004=2812; 2006=2992). Full technical details on the sample, response rates, and other methodological matters are presented in James A. Davis, Tom W. Smith, and Peter V. Marsden, General Social Surveys, 1972-2006: Cumulative Codebook. Chicago: NORC, 2007.

### National Spending Priority Items

Items covering 11 areas have been asked in every GSS since 1973 (Space Exploration Program, Improving and Protecting the Environment, Improving and Protecting the Nation's Health, Solving the Problems of the Big Cities, Halting the Rising Crime Rate, Dealing with Drug Addiction, Improving the Nation's Education System, Improving the Condition of Blacks, The Military, Armaments, and Defense, Foreign Aid, Welfare). Since 1984 an additional four areas have been included (Highways and Roads, Social Security, Mass Transportation, Parks and Recreation). In 2000 a 16th area (Assistance for Childcare) was added and in 2002 a 17th area (Supporting Scientific Research).

Also since 1984, 11 alternative wordings for the original spending items have been asked on a random sub-sample (Space Exploration, The Environment, Health, Assistance to Big Cities, Law Enforcement, Drug Rehabilitation, Education, Assistance to Blacks, National Defense, Assistance to Other Countries, Assistance to the Poor). When the alternative wordings produced distributions that did not significantly differ from the original wordings they have been combined together (Space Exploration Program/Space Exploration, Improving and Protecting the Environment/The Environment, Improving and Protecting the Nation's Health/Health, Improving the Nation's Education System/Education, The Military, Armaments, and Defense/National Defense, Foreign Aid/Assistance to Other Countries). For the remaining five original spending areas the standard and alternative results are presented separately. Differences between the standard and alternative wordings are

examined in Tom W. Smith, "A Preliminary Analysis of Methodological Experiments in the 1984 GSS," GSS Methodological Report No. 30. Chicago: NORC, 1984; Tom W. Smith, "That Which We Call Welfare by Any Other Name Would Smell Sweeter: An Analysis of the Impact of Question Wording on Response Patterns," Public Opinion Quarterly, 51 (Spring, 1987), 75-83; Kenneth A. Rasinski, "The Effect of Question Wording on Public Support for Government Spending," GSS Methodological Report No. 54. Chicago: NORC, 1988; and Tom W. Smith, "Wording Effects on National Spending Priority Items Across Time, 1973-2004," GSS Methodological Report No. 107. Chicago: NORC, 2006.
