

# The March 2024 AAPI Data/AP-NORC Center Poll

Conducted by The Associated Press-NORC Center for Public Affairs Research and AAPI Data with funding from the University of California (UC) Riverside

*Interviews: 03/04-11/2024*

*1,005 Asian American, Native Hawaiian and Pacific Islander adults in the U.S.*

*Margin of sampling error: +/- 4.9 percentage points at the 95% confidence level among the full sample, including the design effect*

*NOTES: All results show percentages among all respondents, unless otherwise labeled. Comparisons to U.S. general adult population polls are provided when applicable.*

**CC6. Do you think climate change is happening, do you think climate change is not happening, or aren't you sure?**

	AAPI Data/AP-NORC 03/04-11/2024	AP-NORC Poll of U.S. Adults 09/07-11/2023
Climate change is happening	84	74
Climate change is not happening	5	11
Not sure if climate change is happening	10	14
SKIPPED ON WEB/REFUSED	1	*
N=	1,005	1,146

*Show if respondent indicates they think climate change is happening*

**CC7. Do you think climate change is caused entirely by human activities, caused mostly by human activities, caused about equally by human activities and natural changes in the environment, caused mostly by natural changes in the environment, or caused entirely by natural changes in the environment?**

## METHODS

This survey was conducted by The Associated Press-NORC Center for Public Affairs Research and AAPI Data with funding from the University of California (UC) Riverside.

Data were collected using the Amplify AAPI Monthly survey drawing from NORC's Amplify AAPI® Panel designed to be representative of the U.S. Asian American, Native Hawaiian and Pacific Islander (AANHPI) household population. The survey was part of a larger study that included questions about other topics not included in this report.

Amplify AAPI is a blend of multiple sample designs. Each stage seeks to provide maximum coverage of the AANHPI population, and all are combined through base-weighting to arrive at a representative overall cross-section of AANHPI in the United States. The first stage included recruitment of approximately 850 active AANHPI panelists from NORC's flagship probability panel, AmeriSpeak. These panelists now serve as members of both the AmeriSpeak and the Amplify AAPI panels. During the initial recruitment phase of the AmeriSpeak panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame or a secondary national address frame, both with over 96% coverage of all U.S. addresses, and then contacted by U.S. mail, email, telephone, or field interviewers (face to face).

The second stage began in the spring of 2022, when Amplify AAPI recruited 150 households from a 30,000-sample pool as a pilot to test the sample design's feasibility and participation rates. In 2023, Blue Shield Foundation of California and UC Riverside/AAPI Data sponsored a recruitment effort in California generating 1,150 additional panelists. Finally, the Rockefeller Foundation funded a national recruitment effort, including new recruits and those from the 2022 Pew Asian American Survey, generating 4,700 panelists who are eligible for the monthly survey.

By providing recruiting and interviewing in the languages noted below, Amplify AAPI covers approximately 90 percent of Asian language “linguistically isolated” households, that is, households in which no adult can speak English or Spanish at least “well.” Those excluded from the sample include people with P.O. Box only addresses, some addresses not listed in the USPS Delivery Sequence File, and some newly constructed dwellings population.

Interviews for this survey were conducted between March 4-11, 2024 with Asian Americans, Native Hawaiians and Pacific Islanders 18 years of age or older representing the 50 states and the District of Columbia. Panel members were randomly drawn from the Amplify AAPI Panel, and 1,005 completed the survey, all via the web. Panel members were invited by email or by phone from an NORC telephone interviewer. In addition to English, the survey was offered in the Chinese dialects of Mandarin and Cantonese, Vietnamese, and Korean, depending on respondent preference.

Respondents were offered a small monetary incentive (either \$3 or \$10) for completing the survey. The overall margin of sampling error is +/-4.9 percentage points at the 95 percent confidence level, including the design effect. The margin of sampling error may be higher for subgroups.

Sampling error is only one of many potential sources of error and there may be other unmeasured error in this or any other survey.

Quality assurance checks were conducted to ensure data quality. In total, 31 interviews were removed for nonresponse to at least 50% of the questions asked of them, for completing the survey in less than one-third the median interview time for the full sample, or for straight-lining all grid questions asked of them. These interviews were excluded from the data file prior to weighting.

Once the sample was selected and fielded, and all the study data were collected and made final, a poststratification process was used to adjust for any survey nonresponse as well as any noncoverage or under and oversampling resulting from the study specific sample design. Poststratification variables included age, gender, census region, race/ethnicity, education, U.S. born, and Asian origin. Weighting variables were obtained from the American Communities Survey (ACS) 5 years data 2017-2021. The weighted data reflect the U.S. Asian American, Native Hawaiian and Pacific Islander (AANHPI) household population, including all 50 states and the District of Columbia.

### **About the Associated Press-NORC Center for Public Affairs Research**

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest-quality journalism to bring key information to people across the nation and throughout the world.

The Associated Press (AP) is an independent global news organization dedicated to factual reporting. Founded in 1846, AP today remains the most trusted source of fast, accurate, unbiased news in all formats and the essential provider of the technology and services vital to the news business. More than half the world's population sees AP journalism every day. [www.ap.org](http://www.ap.org)

NORC at the University of Chicago is one of the oldest objective and nonpartisan research institutions in the world. [www.norc.org](http://www.norc.org)

The two organizations have established The AP-NORC Center for Public Affairs Research to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals. Learn more at [www.apnorc.org](http://www.apnorc.org).

### **About AAPI Data**

AAPI Data is a leading research and policy organization producing accurate data to shift narratives and drive action toward enduring solutions for Asian American (AA) and Native Hawaiian/Pacific Islander (NHPI) communities across the nation. AAPI Data aspires to transform public and private systems to ensure that all AA and NHPI communities are recognized, valued and prioritized. Learn more at [aapidata.com](http://aapidata.com).
