

NORC DATA ENCLAVE

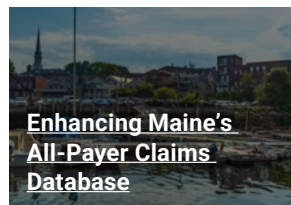

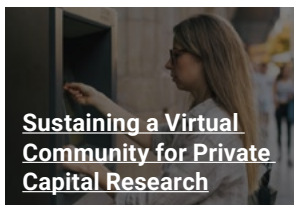

Designed for discovery. Engineered for trust.

The NORC Data Enclave® is a powerful, secure virtual environment where researchers and analysts can remotely access data and collaborate to drive evidence-based decision-making.

Features

- Scalable, future-smart solution tailored to your research or data goals
- Reliable high-performance computational infrastructure
- Role-based access to analysts, researchers, and data scientists
- Design that balances data security, privacy, and utility
- Ready-to-use database, statistical, analytical, productivity, visualization, and reporting tools
- Dedicated Customer Success support
