DATA ENCLAVE
GOV

SECURE. SCALABLE. SMART.

The platform for government data research

One of the biggest blockers to research work is lacking a secure, scalable way to access and share sensitive data.

The solution:

NORC Data Enclave Gov

The NORC Data Enclave® Gov is a data management platform and virtual workspace that enables government agencies to securely share sensitive administrative data with research communities.

➤ High performance

The NORC Data Enclave Gov is delivered as a Platform as a Service (PaaS) using a hybrid cloud environment. It offers flexible, high-performance computing power in a secure virtual workspace.

➤ Designed for research

It's designed for the sharing of sensitive and confidential data between data owners, like government agencies, and their research partners, like academic institutions, nonprofits, and commercial entities.

➤ Cloud when you need it, savings when you don't

Your research goals should be lofty—not your cloud computing bill. The Data Enclave Gov's hybrid cloud architecture offers a cost-efficient approach that adapts to your needs.

➤ Secure and compliant

The secure environment is certified FedRAMP Moderate and can be tailored to adhere to a variety of regulatory frameworks.

➤ All-in-one convenience

Users access data in the Data Enclave Gov's virtual workspace, where they have everything they need: scalable computing power, user-centric design, and an array of database, productivity, and reporting tools. A dedicated help desk supports them along the way.

➤ Turnkey solution

It's a research-ready platform, saving data owners from development costs and delays. Projects are accelerated, collaboration is optimized, and data is put to use to drive meaningful insights.
