

The NORC Data Enclave® and the Data Enclave Gov are trusted virtual environments where researchers can securely access and analyze data to drive evidence-based decision-making.

Features

- **Power:** Reliable, scalable, high-performance computational infrastructure
- **Security:** Hardened security and compliance posture that includes identity and access management
- **Design:** Tailored for collaborative research on sensitive data
- **Functionality:** Ready-to-use database, statistical, analytical, productivity, visualization, and reporting tools
- **Support:** Dedicated help desk and customer success
