Sample and Methodology

Foresight 50+ Omnibus is a nationally representative sample of U.S. adults 50 and older and draws from the Foresight 50+ Panel by AARP and NORC at the University of Chicago. Households are selected randomly from NORC’s National Sample Frame, representative of 97% of U.S. households.

Foresight 50+ uses U.S. mail notifications, NORC telephone interviewers, and in-person field interviewers to recruit panel households. We follow up multiple times with non-respondents to ensure a panel that represents all segments of America’s diverse and evolving 50+ population. Because of this rigorous recruitment, Foresight 50+ surveys achieve the highest response rates of any multi-client research panel.
